

**MAKE A BOLD, MODERN STATEMENT IN THE BATH  
WITH THE NEW ARRIS™ COLLECTION FROM MOEN**

*Oakville, Ontario...* With distinctive styling and crisp, cylindrical, geometric shapes, the new Arris™ bathroom collection from Moen is an ideal choice for homeowners looking to give their bathrooms a chic, modern update. Moen's new complete bathroom suite carefully considers the balance of style and function to provide a collection that is low profile, yet ideal for grand master baths.

"We have taken inspiration from modern architecture, where you often see a sharp edge formed by the intersection of two surfaces," said Chris Gilbert, principle industrial designer, Moen. "And, the new Arris collection offers just that. The distinctly modern suite features sharp 90-degree angles and clean, tubular spouts for a truly iconic style."

Available in Chrome and Moen's LifeShine® Brushed Nickel finishes, faucet options within the Arris collection include a single-handle, single-hole mount faucet, as well as two-handle widespread and wallmount platforms. All faucets are certified to meet WaterSense® criteria, meaning the fixtures meet the Environmental Protection Agency's (EPA) guidelines as environmentally responsible and efficient products. The faucets are flow-optimized and allow water to flow at 5.7 litres per minute (L/min), versus traditional aerators that flow at 8 L/min. And while conserving water, they deliver the sensational water experience that consumers have come to expect from Moen.

Extending the look to the bath tub, matching three- or four-hole Roman tub faucets, are available. The collection can also be combined with Moen's innovative ioDIGITAL® Roman tub, which brings the benefits of technology to the bathroom. This revolutionary, innovative *and* easy-to-use interface gives consumers the ability to set and maintain water temperature and flow with electronic precision.

The benefits of this collection extend into the shower, as well. The Arris suite features ExactTemp® shower-only trim, and Posi-Temp® tub/shower and shower-only trim options – each with the same exquisite styling as the faucets. Showerhead options include a standard showerhead, an Eco-Performance standard showerhead, a 10-inch rainshower, and an Eco-

Performance rainshower. The Eco-Performance showerheads are certified to meet WaterSense® criteria with a flow rate of 7.6 L/min – 20 percent less than the industry standard 9.5 L/min. Eco-Performance showering options comply with CalGreen requirements and contribute toward maximizing LEED® points. A 14-inch shower arm is also available to easily create an overhead showering experience without a full-scale remodel.

The Arris suite also utilizes the innovative Moen® M•PACT® common valve system on its widespread and wallmount faucets, showering options and three- and four-hole Roman tub faucets. This advanced valve architecture makes it quick and easy to change the style of the faucet in minutes... without replacing any faucet plumbing. Simply unscrew the handles and spout, lift them out and replace them with the new style or finish. It is just as easy to change the shower trim.

For a coordinated and finished design, a complete, perfectly matched bath accessory collection is available. Accessories include a double robe hook, pivoting paper holder, tank lever, towel ring, 18- and 24-inch towel bars, 12-, 18-, 24- and 36-inch grab bars and a wall-mount magnifying mirror exclusive to the Arris collection.

The Arris bathroom collection is ADA compliant and offers a limited lifetime warranty.\*
