

**THE PRODUCTS:** Features of Moen products include:

- **Style.** Clean and classic or bold and contemporary – Moen offers a variety of styles designed to complement today's décors.
- **Hydrolock™.** A number of Moen's faucets feature the Hydrolock installation system, making them faster and easier to install. A telltale "click" audibly signals a secure connection and eliminates the need for tools to attach the water line to the faucet.
- **LifeShine® Finish.** With the designer touch of decorative finishes and the durability of chrome, these finishes are guaranteed not to tarnish, corrode or flake off... for life.
- **M•PACT®.** Moen's innovative M•PACT valve makes it easier to upgrade the style of the bathroom without replacing any faucet plumbing. A common valve design allows for a faucet change in just minutes: simply unscrew the handles and spout, lift them out and replace with the new style. It is just as easy to change the shower trim by removing the handle from the wall and replacing the trim.
- **Patented One-Piece Washerless Cartridge.** Moen's patented one-piece cartridge means no washers – the most common cause of annoying drips. The self-contained assembly has fewer parts, meaning greater reliability and worry-free performance year after year.
- **Pause Button.** Available on Moen's Aberdeen™ and Woodmere™ pull-down kitchen faucets, this patented pause button allows the user to pause the flow of water at the wand. It's like having a second "on-off" button in your hand – and convenience at your fingertips.
- **Pressure-Balancing.** Moen pressure-balancing valves adjust automatically to changes in water line pressure—ensuring constant and comfortable water temperatures. Despite demands elsewhere in the system, the water temperature is guaranteed to remain within  $\pm 2^{\circ}\text{F}$  of the temperature you set. For added safety, Moen's temperature limit stops can be set to prevent the handle from being turned to full hot.
- **Pure Touch®.** Moen's PureTouch filtering faucet systems are designed to improve taste and reduce odors in drinking water by removing impurities such as chlorine, lead and harmful cysts, all without removing the beneficial fluoride. Its filtered water is dispensed through a separate channel so that it never mixes with unfiltered water. The system also features an electronic filter life indicator to show when a replacement filter is needed.

- SoundSHIELD™. Available on Moen's Lancelot® stainless steel sinks, SoundSHIELD undercoating provides exceptional sound deadening which creates a much quieter experience when working at the sink.
- Lifetime Warranty. All Moen faucets come with a Lifetime Warranty against leaks, drips and finish defects.
