PRODUCTS AND INNOVATIONS:

Faucets and Showerheads:

- Style. Clean and classic or bold and contemporary – Moen offers a variety of styles designed to complement virtually any décor.
- ioDIGITAL™ – Gives consumers the ability to easily set and maintain water temperature and flow with electronic precision. Available for three applications: vertical spa, shower and Roman tub.
- 1255™ Duralast™ Cartridge – Moen's ceramic-disc cartridge design that provides the smooth feel and reliable operation of a new faucet from the first time you use it to the last.
- Hydrolock®. All Moen® kitchen pull-down and pull-out faucets feature the Hydrolock installation system, making them faster and easier to install. A telltale "click" audibly signals a secure connection and eliminates the need for tools to attach the water line to the faucet.
- LifeShine® Finish. With the designer touch of decorative finishes and the durability of Chrome, these finishes are guaranteed not to tarnish, corrode or flake off...for life.
- M•PACT®. Moen's innovative M•PACT valve makes it easier to upgrade the style of the bathroom without replacing any faucet plumbing. A common-valve design allows for a quick faucet change within minutes: simply unscrew the handles and spout, lift them out and replace with the new style. It's just as easy to change the shower trim by removing the handle from the wall and replacing the trim.
- M•PACT Roman Tub Installation. A valve design, featuring Moen's quick-connect installation system and the M•PACT common valve design, significantly reduces installation time. A unique adjustable shank requires no cutting, is virtually error-proof and is designed to work with a variety of materials, deck thicknesses and faucet trim styles.
- Patented Drip-Proof Cartridge. Moen's patented one-piece cartridge means no washers – the most common cause of annoying drips. The self-contained assembly has fewer parts, meaning greater reliability and worry-free performance year after year.
- Pause Button. Available on many of Moen's pull-out kitchen faucets, this patented pause button allows the user to perform tasks outside of the sink area by pausing the flow of water at the wand. It's like having a second "on-off" button in your hand – and convenience at your fingertips.
- Immersion®. This rainshower technology channels water through a spoke design, concentrating and magnifying the natural force of the water to dramatically enhance the showering experience.
- InvigoRain® Pressurized Spray. Water is channeled through the showerhead with three times more spray power than most. This advanced self-pressurizing technology provides excellent force and full-body coverage for an exhilarating showering experience.
- Posi-Temp®. Moen pressure-balancing valves adjust automatically to changes in water line pressure – ensuring constant and comfortable water temperatures. Despite demands elsewhere in the system, the water temperature is guaranteed to remain within $\pm 3^{\circ}\text{F}$ of the set temperature. For added safety, Moen's temperature limit stops can be set to prevent the handle from being turned to full hot.
- Moentrol®. Water volume and temperature is at the user's control – allowing them to adjust the amount of water that flows through the tub

or shower – from a gentle stream to full force. In addition, the simple operation allows users to push the handle to shut off water flow, and then pull the handle out to turn it on – with water quickly returning to the same temperature setting that was last used.

- ExactTemp®. These unique valves create a customized shower for each individual. Users simply dial in the desired temperature of a shower so the ideal temperature is reached day after day, even if the hot water level in the tank gets low. The volume control enables users to enjoy different volumes for different fixtures – one volume for the showerhead, another for the handshower and yet another for the body spray. To ensure safety, it immediately responds to changes in water pressure to prevent scalding-hot or ice-cold water flow.
- Outdoor Sill Faucets. In addition to cold-only models, Moen's unique hot/cold faucet designs provide the benefits of simple single-handle operation and easier single-hole installation. All models offer anti-siphon and frost-free protection. Enjoy more choices and greater convenience for outdoor living.
- Lifetime Limited Warranty. All Moen faucets come with a Lifetime Limited Warranty against leaks, drips and finish defects.

Accessories:

- Pro-Fit®. Available on a variety of accessory collections, this single-screw mounting system reduces the number of mounting screws by half. Additionally, it eliminates the need for a set screw.
- EZ 2 Install. This innovative slide and lock architecture eliminates the set screw, resulting in easy, effortless installation. Simply place the decorative accessory over the mounting base that is secured to the wall with two screws, and slide down to securely lock in place.
- SecureMount™. Available on Home Care™ by Moen products, this patented technology allows anyone to quickly and easily install grab bars securely, with or without studs, while also providing a 500-pound weight pull capacity that exceeds ADA requirements.

Sinks:

- SoundSHIELD™. Available on all Moen stainless steel sinks, SoundSHIELD undercoating provides exceptional sound deadening which creates a much quieter experience when working at the sink.

TRADEMARKS:

®Ascent, AquaSuite, Bamboo, Banbury, Boutique, Camelot, Camerist, Caprillo, Casa, Castleby, Cathedral, Chateau, Colonnade, Cordin, Corrine, Destiny, Divine, Eva, ExactTemp, Excalibur, Extensa, Felicity, Hi-Fill, Immersion, Integra, InvigoRain, Isabel, Lancelot, Lancelot Professional, LifeShine, Mannerly, MicroTech, Moen, Moenflo, Moentrol, Monticello, M•PACT, One Touch, Posi-Temp, Pro-Fit, Salora, Satine, Savvy, Solace, Touch Control, Traditional, Trianna, Vestige, Villeta, Vivid, Waterhill, Wickston, Woodmere, the Moen *Buy it for looks.
