**Tim McDonough,** *Vice President, Global Brand Marketing*

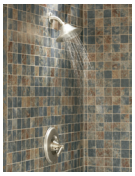

## LOCATIONS

JANUARY 2015

# PRODUCTS AND INNOVATIONS

## SHOWERING

### ioDIGITAL®
Gives consumers the ability to easily set and maintain water temperature and flow with electronic precision. Available for three applications: vertical spa, shower and Roman tub.

### Immersion®
This rainshower technology channels water through a spoke design, concentrating and magnifying the natural force of the water to dramatically enhance the showering experience.

### Mosaic™ Flushmount Multi-Function Body Sprays
Moen's first-to-market, flushmount multi-function body sprays offer a customizable showering experience with the option of switching between two spray functions: traditional spray or pulsing massage.

### Magnetix™ Handheld Showerheads
Magnetix™—it's a snap to use. The new handheld shower collection offers a powerful magnetic dock to allow for easy release, while also securely snapping the hand shower back into place—even with your eyes closed. The transitionally styled, multi-function showerheads offer six high-performance spray options.

## CARTRIDGES

### 1255®, 1234 and 1258 Duralast® Cartridges
Moen's ceramic-disc cartridge design that provides the smooth feel and reliable operation of a new faucet from the first time you use it to the last.

### 1225® Drip-Proof Cartridge
Moen's one-piece cartridge means no washers—the most common cause of annoying drips. The self-contained assembly has fewer parts, meaning greater reliability and worry-free performance year after year.

## INSTALLATION

### Duralock™ Quick–Connect System
Assures quick, secure and hassle-free installation for a variety of Moen® kitchen and bath faucets. This solution helps save valuable time for plumbers and DIY installers, alike. The intuitive system utilizes a proprietary, push-button connector and can be installed without the use of tools. Plus, an audible "click" assures a secure connection.

### M•PACT® Common Valve System
Moen's innovative system makes it easier to upgrade the style of the bathroom faucet without replacing any plumbing. A common-valve design allows for a quick faucet change within minutes: simply unscrew the handles and spout, lift them out and replace with the new style. It's just as easy to change the shower trim by removing the handle from the wall and replacing the trim.

### Pro-Fit®
The Pro-Fit® Installation System eliminates set screws for faster, easier mounting. There's even a template with a built-in level. Available exclusively on select Moen® accessories.

Buy it for looks. Buy it for life.®

## INSTALLATION

### SecureMount™

Available on Moen® Home Care® products, this patented technology allows anyone to quickly and easily install grab bars securely, with or without studs, while also providing a 300-pound weight pull capacity that exceeds current ADA requirements.

## FINISHES

### LifeShine® Finish

With the designer touch of decorative finishes and the durability of Chrome, these finishes will not tarnish, corrode or flake off for years.

### Spot Resist™ Finish

Moen's exclusive Spot Resist™ finish—the number one selling spot resistant finish—resists fingerprints and water spots. The innovative finish helps maintain the brilliance of kitchen, bathroom and tub/shower faucets, showerheads or accessories for a fresh appearance.

### Microban® Antimicrobial Technology

Moen is utilizing technology from Microban International, Ltd., the global leader in built-in antimicrobial product protection, to help keep kitchen and bathroom faucet surfaces cleaner by resisting odor- and stain-causing bacteria. Microban antimicrobial protection has been added into the finishes of select Moen bath and kitchen faucets.

Microban® is a registered trademark of Microban International, Ltd. Used with permission.

## FUNCTIONALITY

### MotionSense™

Imagine the convenience of having a kitchen faucet that can sense what a homeowner is trying to accomplish and, with a simple wave of the hand, immediately responds to their needs. MotionSense™ from Moen detects your movement, setting water flow in motion, on command. This hands-free convenience lets users speed through everyday tasks with greater ease and efficiency. Plus, being able to use the faucet without having to touch it helps you control the spread of dirt and germs.

### The Reflex® System

To improve the overall experience with pullout and pulldown kitchen faucets, the Moen® Reflex® system offers a spray wand designed to put itself away and provides smooth operation, easy maneuverability and secure docking of the wand.

### Pause Button

Available on many of Moen's pullout and pulldown kitchen faucets, this pause button allows the user to perform tasks outside of the sink area by pausing the flow of water at the spray wand. It's like having a second "on-off" button in your hand—and convenience at your fingertips.

### SoundSHIELD™

Available on all Moen stainless steel sinks, SoundSHIELD™ undercoating provides exceptional sound deadening, which creates a much quieter experience when working at the sink.

## VALVES

### ioDIGITAL® Digital Valve

This innovative digital valve is the foundation of Moen's ioDIGITAL® system, which provides consumers the ability to easily control water temperature and flow with electronic precision. The ioDIGITAL valve plugs into a standard 110v power outlet than can be located in a linen closet, under the tub—up to 30 feet from the bathroom—for easier installation and retrofit flexibility.

### Posi-Temp®

Moen pressure-balancing valves adjust automatically to changes in water line pressure—ensuring constant and comfortable water temperatures. Despite demands elsewhere in the system, the water temperature will remain within ± 3°F of the set temperature. For added safety, Moen's temperature limit stops can be set to control maximum hot water temperature.

### Moentrol®

Water volume and temperature is at the user's control—allowing him or her to adjust the amount of water that flows through the tub or shower—from a gentle stream to full force. In addition, the simple operation allows users to push the handle to shut off water flow, and then pull the handle out to turn it on—with water quickly returning to the same temperature setting that was last used.

### ExactTemp®

These unique valves create a customized shower for each individual. Users simply dial in the desired temperature of a shower so the ideal temperature is reached day after day. Separate volume control valves enable users to enjoy different volumes for different fixtures—one volume for the showerhead, another for the hand shower and yet another for the body spray. To ensure safety, the ExactTemp® valve immediately responds to changes in water pressure to minimize the duration of sudden, unwanted hot or cold water temperature changes.

## RELIABILITY

### Limited Lifetime Warranty

All Moen faucets come with a Limited Lifetime Warranty against leaks, drips and finish defects. See Moen.com for complete warranty information.
